

## *Mirror of Power – The sixteenth episode*

Public companies in Serbia are usually branded by a large number of employees. The situation in Novi Sad is not much different. In this episode of the series, we have asked the competent local authorities whether and to what extent are public communal companies in Novi Sad overstaffed. Director of the public company “Stan” (Flat), one of the Novi Sad public communal companies, gives answer to the same question, but also to whether there is a politically-based hiring of staff in this company. Zoran Stojiljkovic from the Anti-corruption Agency also gives opinion on this issue.
